Versioning

Version number	Amendments	Date
Draft	NZ Addresses & Roads – Data Dictionary Draft	22 September 2025
1.0	NZ Addresses – Data Dictionary	20 October 2025
1.1	NZ Addresses – Data Dictionary Update	19 January 2026
1.2	NZ Addresses – Add Road ID NZ Addresses & Roads - Add ASCII Fields	3 February 2026
1.3	Added deprecated information	4 March 2026

1 Introduction

1.1 Purpose

This data dictionary provides detailed information about the structure, attributes, and data types of new address and associated roads datasets to be published on the LINZ Data Service (LDS) in March 2026.

Section 1 describes the changes that will be made to the address data, Section 2 lists the schema of the current data and includes migration notes to help explain the differences between the deprecated and new datasets and support your transition to the new data schema. Section 3 sets out the schema of the new datasets, and now published out of pilot in March 2026.

1.2 Background

LINZ is modernising its address management system to improve how we manage and deliver address and associated roads data. These enhancements will make it easier to meet customer needs and provide more timely updates.

In March 2026, Address Information Management System (AIMS) will be replaced with a new cloud-based system. This means the structure of the addressing and associated roads data available through the LINZ Data Service will change.

The new data structure is simpler and more accurately reflects how addresses and roads work in the real world. Importantly the existing address and road IDs will not change.

The new NZ Addresses dataset merges two older address data sources AIMS and CADS (Comprehensive Address Data Store) into a single authoritative layer. This consolidation significantly improves data quality, consistency, and alignment with national addressing standards. It also gives users access to over 100,000 additional addresses than currently available in the AIMS database.

1.3 Current Datasets

The new datasets are available now so you can start testing and planning your transition to the new data schema.

- NZ Addresses: [LINZ Data Service](#)
- NZ Addresses: Roads: [LINZ Data Service](#)
- NZ Addresses: Road Sections: [LINZ Data Service](#)

1.4 Data Schema Changes

The new datasets feature a simplified data schema. Schema improvements include:

- Consolidation of multiple address sources into a unified dataset
- Simplified field structure with improved consistency
- Improved alignment with national addressing standards
- Removing data that is not maintained or no longer required.

1.5 Timeframes

- New datasets available in pilot from 20 October 2025
- Share any feedback on the new datasets [here](#) before 15 December 2025.
- The new schema will be confirmed in January 2026.
- Ensure you have switched to new datasets by 4 March 2026.
- Current datasets will be available but not updated after March 2026.

1.6 File Format

All attributes are UTF-8 encoded to support macrons. The spatial reference is NZGD2000 (EPSG 4167). Address data is stored as point features; road data is stored as LineString features.

1.7 Definitions

Text	Text
AIMS	Addressing Information Management System
CADS	Comprehensive Address Data Store
LDS	LINZ Data Service

2 Migration from Current Datasets

The following tables summarise how current schemas map to the new pilot data.

2.1 NZ Addresses

NZ Addresses (Deprecated): <https://data.linz.govt.nz/layer/105689>

NZ Addresses: <https://data.linz.govt.nz/layer/123113>

Current field	Action	New field	Migration note
address_id	No change	address_id	
	New field	road_id	
source_dataset	Removed		No longer required now AIMS and CADS are merged
change_id	Removed		Version control management no longer uses change_id
full_address_number	No change	full_address_number	
full_road_name	No change	full_road_name	
full_address	No change	full_address	
territorial_authority	No change	territorial_authority	
unit_type	Removed		Only 2% of units had an associated unit type
unit_value	Rename	unit	Apply consistent naming
level_type	Removed		Only 13 addresses had a level type
level_value	Removed		Only 13 addresses had a level value
address_number_prefix	Removed		Data consolidated into address_number_suffix field
address_number	No change	address_number	
address_number_suffix	No change	address_number_suffix	

Current field	Action	New field	Migration note
address_number_high	No change	address_number_high	
road_name_prefix	Removed		No addresses had a road name prefix
road_name	No change	road_name	
road_type_name	Rename	road_name_type	Apply consistent naming
road_suffix	Rename	road_name_suffix	Apply consistent naming
water_name	Removed		Data consolidated into road_name field
water_body_name	Removed		Data consolidated into suburb_locality field
suburb_locality	No change	suburb_locality	
town_city	No change	town_city	
address_class	Rename	is_land	Boolean field where yes is a land address and no is a water address with no road access
address_lifecycle	No change		
gd2000_xcoord	Removed		Coordinates can be converted in LDS
gd2000_ycoord	Removed		Coordinates can be converted in LDS
full_road_name_ascii	No change	full_road_name_ascii	
full_address_ascii	No change	full_address_ascii	
territorial_authority_ascii	No change	territorial_authority_ascii	
road_name_ascii	No change	road_name_ascii	
suburb_locality_ascii	No change	suburb_locality_ascii	
town_city_ascii	No change	town_city_ascii	
shape	No change	shape	

2.2 NZ Roads (Addressing)

NZ Roads (Addressing) (Deprecated): <https://data.linz.govt.nz/layer/53382-nz-roads-addressing/>

NZ Addresses: Roads: <https://data.linz.govt.nz/layer/123110>

Current field	Action	New field	Migration note
road_id	No change	road_id	
road_type	Removed		Road type consolidated to road name type
road_name_class	Removed		Road class consolidated into road name type
full_road_name	No change	full_road_name	
road_name_label	No change	road_name_label	
road_name_prefix	Removed		No roads had a road name prefix
road_name_body	No change	road_name_body	
road_name_type	No change	road_name_type	
road_name_suffix	No change	road_name_suffix	
route_name_body	Removed		Route name body consolidated to road name body
route_name_number	Removed		Route name number consolidated to road name number
route_name_alpha	Removed		Route name alpha consolidated to road name alpha
route_name_suffix	Removed		Route names fields consolidated to road names

geometry_class	Rename	is_land	Boolean field where yes is a land road and no is water access only
full_road_name_ascii	No change	full_road_name_ascii	
road_name_label_ascii	No change	road_name_label_ascii	
road_name_body_ascii	No change	road_name_body_ascii	
shape	No change	shape	

2.3 NZ Roads Subsections (Addressing)

NZ Roads Subsections (Addressing) (Deprecated)

<https://data.linz.govt.nz/layer/53383-nz-roads-subsections-addressing/>

NZ Road Sections: <https://data.linz.govt.nz/layer/123109>

Current field	Action	New field	Migration note
road_section_geometry_id	Removed		Consolidated road section geometry ID into road section ID
road_section_id	No change	road_section_id	
road_type	Removed	road_type	Road type consolidated to road name type
road_section_type	Removed		Less than 10% of road subsections had a section type
address_range_road_id	Removed		Range IDs not required as addresses are unique.
road_id	No change	road_id	
full_road_name	No change	full_road_name	

Current field	Action	New field	Migration note
road_name_label	No change	road_name_label	
road_name_prefix	Removed		No roads had a name prefix
road_name_body	No change	road_name_body	
road_name_type	No change	road_name_type	
road_name_suffix	No change	road_name_suffix	
secondary_road_name	No change	secondary_road_name	
	New field	tertiary_road_name	
full_route_name	Removed		Consolidated full route name to full road name
secondary_route_name	Removed		Consolidated secondary route name to full road name
tertiary_route_name	Removed		Consolidated tertiary route name to full road name
left_suburb_locality	Rename	suburb_locality	Main suburb or locality with largest spatial overlap
right_suburb_locality	Removed		Left and right suburb no longer maintained.
left_town_city	Rename	town_city	Main town with largest spatial overlap recorded.
right_town_city	Removed		Left and right town no longer maintained.
left_territorial_authority	Rename	territorial_authority	Main Territorial Authority with largest spatial overlap
right_territorial_authority	Removed		Left and right territorial authority not maintained.
geometry_class	Rename	is_land	Boolean field where yes is a land road and no is water access only
full_road_name_ascii	No change	full_road_name_ascii	
road_name_label_ascii	No change	road_name_label_ascii	

Current field	Action	New field	Migration note
road_name_body_ascii	No change	road_name_body_ascii	
secondary_road_name_ascii	No change	secondary_road_name_ascii	
	New field	tertiary_road_name_ascii	
	New field	suburb_locality_ascii	
	New field	town_city_ascii	
	New field	territorial_authority_ascii	
shape	No change	shape	

3 New Data Schema

3.1 NZ Addresses

<https://data.linz.govt.nz/layer/123113>

Core components of an address (street number, street name, suburb) and a unique address identifier.

Column Name	Data Type	Example	Description
address_id	integer	3000000	Unique identifier for the address
road_id	integer	1000000	Unique identifier for the road
full_address_number	text	1/100A-120A	Concatenation of all address number components
full_road_name	text	Queen Street West	Concatenation of all address road name components
full_address	text	1/100A-120A, Queen Street West, Auckland Central, Auckland	Concatenation of all address components
territorial_authority	text	Auckland	Territorial Authority sourced from latest StatsNZ data
unit	text	1	Alphanumeric value for a unit
address_number	integer	100	Address number excluding unit value and suffix
address_number_suffix	text	A	Alphanumeric characters that follow the address number
address_number_high	integer	120	The higher number in a range address eg 100-120
road_name	text	Queen	Name of road excluding prefix, type, or suffix
road_name_type	text	Street	Type of road eg Road or Street
road_name_suffix	text	West	A component of the road name that follows road type

Column Name	Data Type	Example	Description
suburb_locality	text	Auckland Central	Suburb or locality of the address sourced from NZ Suburbs and Localities , geospatially joined to the address
town_city	text	Auckland	Town or city of the address sourced from NZ Suburbs and Localities , geospatially joined to the address
is_land	boolean	true	Boolean field where yes is a land address and no is a water address with no road access
address_lifecycle	text	Current	The address status is either current or proposed. Retired addresses are not included in this dataset.
full_road_name_ascii	text	Queen Street West	Full road name in ascii where macrons are not supported
full_address_ascii	text	1/100A-120A, Queen Street West, Auckland Central, Auckland	Full address in ascii where macrons are not supported
territorial_authority_ascii	text	Auckland	Territorial Authority in ascii where macrons are not supported
road_name_ascii	text	Queen	Road name in ascii where macrons are not supported
suburb_locality_ascii	text	Auckland Central	Suburb or locality in ascii where macrons are not supported
town_city_ascii	text	Auckland	Town or city in ascii where macrons are not supported
shape	geometry (Point, EPSG:4167)	<geometry>	Spatial geometry for the point in lat/long NZGD2000 (EPSG 4167).

3.2 NZ Addresses: Roads

<https://data.linz.govt.nz/layer/123110>

Named roads and road type for context and labelling.

Column Name	Data Type	Example	Description
road_id	integer	1000000	Unique identifier for the road
full_road_name	text	Queen Street West	Concatenation of all road name components
road_name_label	text	Queen St W	Concatenation of all road name component abbreviations
road_name_body	text	Queen	Name of road excluding prefix, type, or suffix
road_name_type	text	Street	Type of road eg Road or Street
road_name_suffix	text	West	A component of the road name that follows road type
is_land	boolean	true	Boolean field where yes is a land address and no is a water address with no road access
full_road_name_ascii	text	Queen Street West	Full road name in ascii where macrons are not supported
road_name_label_ascii	text	Queen St W	Road name label in ascii where macrons are not supported
road_name_body_ascii	text	Queen	Road name body in ascii where macrons are not supported
shape	geometry (MultiLineString, EPSG:4167)	<geometry>	Spatial geometry for the polyline in lat/long NZGD2000 EPSG 4167

3.3 NZ Addresses: Road Sections

<https://data.linz.govt.nz/layer/123109>

Sections of roads for labelling and for associating suburb, locality and territorial authority attributes.

Column Name	Data Type	Example	Description
road_section_id	integer	2000000	Unique identifier for the road section
road_id	integer	1000000	Unique identifier for the road
full_road_name	text	Queen Street West	Concatenation of all road name components
road_name_label	text	Queen St W	Concatenation of all road name component abbreviations
road_name_body	text	Queen	Name of road excluding prefix, type, or suffix
road_name_type	text	Street	Type of road eg Road or Street
road_name_suffix	text	West	A component of the road name that follows road type
secondary_road_name	text	State Highway 45	Full road name of any second alternative name for road section
tertiary_road_name	text	Surf Highway	Full road name of any third alternative name
suburb_locality	text	Auckland Central	Suburb or locality of the road section sourced from NZ Suburbs and Localities , geospatially joined to the address
town_city	text	Auckland	Town or city of the road section sourced from NZ Suburbs and Localities , geospatially joined to the address
territorial_authority	text	Auckland	Territorial Authority sourced from latest StatsNZ data, geospatially joined to the address

Column Name	Data Type	Example	Description
is_land	boolean	true	Boolean field where yes is a land address and no is a water address with no road access
full_road_name_ascii	text	Pa Street West	Full road name in ascii where macrons are not supported
road_name_label_ascii	text	Pa St W	Road name label in ascii where macrons are not supported
road_name_body_ascii	text	Pa	Road name body in ascii where macrons are not supported
secondary_road_name_ascii	text	Kowhai Drive	Secondary road name in ascii where macrons are not supported
tertiary_road_name_ascii	text	Kaikoura	Tertiary road name in ascii where macrons are not supported
suburb_locality_ascii	text	Whakaki	Suburb locality name in ascii where macrons are not supported
town_city_ascii	text	Taupo	Town city name in ascii where macrons are not supported
territorial_authority_ascii	text	Taupo	Territorial authority name in ascii where macrons are not supported
shape	geometry (LineString, EPSG:4167)	<geometry>	Spatial geometry for the line segment in lat/long NZGD2000 (EPSG 4167)
